Re: Distribution of Our Quartz Crystal Devices

Thank you very much for your continual support for our crystal devices.

As you may know, we have placed a limitation on application of our quartz crystal devices (crystal units and crystal oscillator), and please allow us to inform you that we do not sell our products, which could be used for any of the applications described below.

【Prohibited application of our quartz crystal devices】

In-car product, medical equipment, defense article, aviation-related equipment, Aerospace, and all other required high integrity involving human lives and their property.

The reasons for this prohibition include that our quality assurance system for those applications above has not established and we do not have any plan to establish it in the future, and it is prohibited to sell our products for some applications under the national direction.

If you have any questions, please feel free to contact us.

Your understanding is appreciated.

Yours faithfully,
